

OPEN HOUSE: APRIL 24

On Thursday, April 24 the Skagit Climate Science Consortium (SC²) is hosting a community open house entitled **Skagit County Flood Risk in a Changing Climate** to explore changes SC² scientists are already seeing, modeled future projections, and flood risk in Skagit County.

The Skagit Climate Science Consortium is a group of research scientists from universities and federal, municipal, and tribal governments and agencies working in the Skagit Basin. SC² seeks to understand how the landscape, plants, animals and people may be affected by changes in the patterns of rain, snow, temperature, storms and tides. *Our vision is to reduce the vulnerability of human communities and ecosystems in the Skagit River basin to the impacts of a changing climate.*

DATE/TIME: **Thursday, April 24, 4:30 to 7:30 p.m.**
30 minute presentation at 6:00 p.m.

LOCATION: Best Western Plus Skagit Valley Inn (formerly known as The Cotton Tree), Cascade Ballroom, 2300 Market Street, Mt. Vernon, WA 98273

RSVP: To ensure we get adequate space and refreshments, please RSVP to cmacilroy@gmail.com.
